***Election/Restrictions***

1. Applicants are requested to comply with sequence rules and advised of the sequence rules. Requirements for patent applications containing sequences are listed in MPEP § 2420-2422, specifically section 2422.03 wherein it is required that a sequence identification number is required for each sequence. Claim 38 of the instant application contains sequences not properly identified; hence the application does not comply with the requirements listed in the noted sections of the MPEP. Applicants are further requested to review the entire application to ensure sequence rule compliance.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 41 and 42, drawn to a method of detecting in a sample a modified tubulin, classified in class 435, subclass 7.1.
  - II. Claims 18-20, drawn to a monoclonal antibody, classified in class 530, subclass 388.1.
  - III. Claims 21-30, drawn to a method of monitoring the amount of modified B-tubulin isotype, classified in class 435, subclass 4.
  - IV. Claims 31-36, drawn to a method of isolating a B-tubulin isotype, classified in class 435, subclass 7.5.
  - V. Claims 37-40, drawn to a method of detecting an antibody, classified in class 435, subclass 7.1.

Art Unit: 1642

3. The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I and III-V differ in the method objectives, method steps and parameters and in the reagents used.

Inventions of Group II and of Groups I, III-V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, any of the monoclonal antibodies of Group II can be used in any of the methods of Groups I and III-V.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
